

ARG ILLA TERRACQUE

A photograph of a geological landscape featuring a small, clear blue pool of water in the foreground, surrounded by layered rock formations in various shades of brown, tan, and grey. The background shows more rugged, layered rock formations with some sparse vegetation. The text is overlaid on the left side of the image.

THE COLOURS OF THE
GROUND CHANGE OVER
HOURS AND SEASONS

ARGILLA TERREACQUE riscopre le espressioni più naturali delle terre faentine, le argille, creando una gamma cromatica dalla tonalità pastello, in cui la materia diventa protagonista.

ARGILLA TERREACQUE rediscovers the most natural expressions of the Faentinian lands, the clays, creating a chromatic range with a pastel shade, where the material becomes the main subject.

Le 6 tonalità di colore sono fra loro affini, interpretate da due diverse superfici: QUARTZ e MATERIAL per rivestimenti e pavimentazioni.

Il grigio DRY e il chiaro BIACCA, colori moderni e raffinati, ricordano la presenza di una vena del gesso, determinando una tendenza fredda e rocciosa. Il marrone FOG e il bruno DARK, si presentano con tonalità più calde richiamando le argille più superficiali. VETIVER e MARINE completano la collezione con il riferimento all'acqua, naturale compendio della terra.

These 6 colours shades are available on two different surfaces: QUARTZ and MATERIAL for both floor and wall applications.

The DRY grey and the BIACCA clear, modern and refined colors, recall the presence of a vein of chalk, determining a cold and rocky trend. FOG brown and DARK brown are presented in warmer tones recalling the more superficial clays. VETIVER and MARINE complete the collection with reference to water, the natural compendium of the earth.

La superficie **MATERIAL** è opaca e al tatto presenta un lieve rilievo che ricorda un intonaco irregolare. Disponibile nello spessore sottile di ≈ 6 mm, è ideale per pavimentazioni e vibranti rivestimenti.

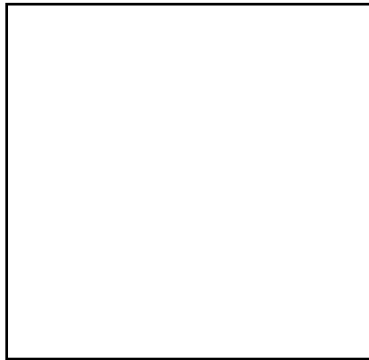

La superficie **QUARTZ** presenta una lucidatura molto naturale che ricorda i cementi levigati al quarzo. Disponibile nello spessore di ≈ 12 mm, è ideale per resistenti ed eleganti pavimentazioni di ambienti commerciali e residenziali.

MATERIAL surface is matte and reveals to the touch a slight relief, reminiscent of unfinished gypsum. Available in ≈ 6 mm thickness, it is ideal for floorings and vibrant coverings.

QUARTZ surface has a very natural brushed look, that recalls of buffed quartz cement. Available in ≈ 12 mm thickness, it is ideal for durable elegant floorings in both commercial and residential spaces.
